Journal of Fermentation and Bioengineering

CONTENTS
VOLUME 67 • 1989

ORIGINALS

Improvement and Application of a Promoter-Probe Vector Bearing the *PHO5* Gene as the Indicator Marker in *Saccharomyces cerevisiae.* Yong-Il Hwang, Satoshi Harashima, and Yasuji Oshima 1- 7

Purification and Characterization of Cellulases from *Clostridium thermocopriae* sp. nov. JT3-3. Fengxie Jin and Kiyoshi Toda 8-13

Isolation and Characterization of Carboxylesterase from Vinyl Acetate-Assimilating Bacterium Isolated from Soil. Yoshiro Hatanaka, Yoshiharu Inoue, Kousaku Murata, and Akira Kimura 14-19

Purification and Properties of the NAD^+-Xylitol-Dehydrogenase from the Yeast *Pichia stipitis.* Manfred Rizzi, Katharina Harwart, Petra Erlemann, Ngoc-Anh Bui-Thanh, and Hanswerner Dellweg 20-24

A Kinetic Study of the NAD^+-Xylitol-Dehydrogenase from the Yeast *Pichia stipitis.* Manfred Rizzi, Katharina Harwart, Ngoc-Anh Bui-Thanh, and Hanswerner Dellweg 25-30

Production of Peroxidase with Horseradish Hairy Root Cells in a Two Step Culture System. Masahito Taya, Akihiko Yoyama, Ryuji Nomura, Osamu Kondo, Chiaki Matsui, and Takeshi Kobayashi 31-34

Xylitol Production by a Methanol Yeast, *Candida boidinii* (*Kloeckera* sp.) No. 2201. Vitchuporn Vongsuvanlert and Yoshiki Tani 35-39

Continuous Ethanol Fermentation of Concentrated Sugar Solutions Coupled with Membrane Distillation Using a PTFE Module. Ronnie L. Calibo, Masatoshi Matsumura, and Hiroshi Kataoka 40-45

Batch Culture Kinetics of L-Lactate Fermentation Employing *Streptococcus* sp. IO-1. Ayaaki Ishizaki and Tomomi Ohta 46-51

A Novel Method—a "Freeze-Blast" Method—to Disrupt Microbial Cells. Yoshiyuki Omori, Taizo Ichida, Rie Ukita, Masako Osumi, Mitsuyoshi Ueda, and Atsuo Tanaka 52-56

Nitrogen Transformation during Thermophilic Composting. Naoyuki Morisaki, Chae Gun Phae, Kiyohiko Nakasaki, Makoto Shoda, and Hiroshi Kubota 57-61

Nutrient Removal from Secondary Effluent by Filamentous Algae. Susumu Hashimoto and Kenji Furukawa 62-69

Role of the Pre-Pro-Region of Neutral Protease in Secretion in *Bacillus subtilis.* Masahiro Takagi and Tadayuki Imanaka 71-76

Purification and Characterization of Endo-1,4-β-Xylanase from *Paecilomyces varioti* Bainier. Savita Krishnamurthy and Paul Joseph Vithayathil 77-82

Purification and Some Properties of Trehalase from *Chaetomium aureum* MS-27. Mitsuo Sumida, Sei Ogura, Shigekazu Miyata, Motoo Arai, and Sawao Murao 83-86

***Mirin*-Making from *Koji* Prepared with a Mutant *Aspergillus oryzae* Producing High Activity of Carboxypeptidase.** Haruo Oyashiki, Masahiro Uchida, Akira Obayashi, and Satoru Oka 87-91

Elucidation of Optimum Conditions for Immobilization of Viable Cells by Using Calcium Alginate. James Chukwuma Ogbonna, Yoshifumi Amano, and Kazuo Nakamura... 92- 96
Continuous Alcohol Production from Starchy Materials with a Novel Immobilized Cell/Enzyme Bioreactor. Kazuhiro Yamade and Susumu Fukushima 97-101
Extracellular Production of Menaquinone-4 by a Mutant of *Flavobacterium* sp. 238-7 with a Detergent-Supplemented Culture. Yoshiki Tani and Hisataka Taguchi 102-106
Hyperproduction of Aspartase by a Catabolite Repression-Resistant Mutant of *Escherichia coli* B Harboring Multicopy *aspA* and *par* Recombinant Plasmids. Noriyuki Nishimura, Tomoyasu Taniguchi, and Saburo Komatsubara 107-110
Manganese Dependent Production of 5′-Nucleotidase by Alkalophilic *Bacillus* No. C-3. Yoko Ikura and Koki Horikoshi 111-114
The Role of L-Phenylalanine in the Production of Isobutene by *Rhodotorula minuta*. Takao Fujii, Yoshinobu Ohga, Takahira Ogawa, and Hideo Fukuda 115-118
Simultaneous Organic Carbon Removal-Nitrification by an Activated Sludge Process with Cross-Flow Filtration. Yuichi Suwa, Takao Yamagishi, Yoshikuni Urushigawa, and Masanao Hirai 119-125
SCP Production and Removal of Organic Load from Cassava Starch Industry Waste by Yeasts. Rajagopalan Jamuna and Sonti Venkata Ramakrishna..... 126-131
Identification of an Ice-Nucleating Bacterium and Its Ice Nucleation Properties. Hitoshi Obata, Tsuyoshi Nakai, Junichi Tanishita, and Tai Tokuyama 143-147
Isolation of Two Glucodisaccharides from Japanese Wines. Kotoyoshi Nakanishi and Koki Yokotsuka 148-152
Purification and Properties of Isocitrate Lyase from *Candida brassicae* E-17. Kazuo Nakamura, Yoshifumi Amano, Masao Nakadate, and Motoo Kagami 153-157
Use of Glutaminase for Soy Sauce Made by *Koji* or a Preparation of Proteases from *Aspergillus oryzae*. Tadanobu Nakadai and Seiichi Nasuno 158-162
Evaluation of *Koji* Prepared with Various Molds for *Mirin*-Making. Haruo Oyashiki, Masahiro Uchida, Akira Obayashi, and Satoru Oka 163-168
Enzymatic Production of L-Cysteine with Tryptophan Synthase of *Escherichia coli*. Ken-ichi Ishiwata, Takeshi Nakamura, Masao Shimada, and Nobuyoshi Makiguchi... 169-172
Ethylene Production from L-Methionine by *Cryptococcus albidus*. Hideo Fukuda, Masaya Takahashi, Takao Fujii, and Takahira Ogawa 173-175
Predominant Growth of *α*-Amylase Regulation Mutant in Continuous Culture of *Bacillus caldolyticus*. Chu Yuan Cheng, Isamu Yabe, and Kiyoshi Toda 176-181
A Simple Method of Cellulase Immobilization on a Modified Silica Support. Motomitsu Kitaoka, Hajime Taniguchi, and Takashi Sasaki 182-185
Fiber Entrapment of Naringinase from *Penicillium* sp. and Application to Fruit Juice Debittering. Hau-Yang Tsen, Shiou-Yuh Tsai, and Gee-Kaite Yu 186-189
Perfusion Culture of Hybridoma Cells Using a Centrifuge to Separate Cells from Culture Mixture. Kimihiko Hamamoto, Kenji Ishimaru, and Michiyuki Tokashiki 190-194
On-Line Extraction of Volatile Fatty Acids in Acidogenic Chemostat Culture Using a Supported Liquid Membrane. Pakorn Nuchnoi, Naomichi Nishio, and Shiro Nagai ... 195-199
Biomass Control in a Fixed-Bed Anaerobic Reactor. Akihiko Hogetsu and Hiroyuki Chifuku 200-206
New Antibiotic-Producing *Streptomyces* TT-Strain, Generated by Electrical Fusion of Protoplasts. Tokumitsu Okamura, Shinji Nagata, Haruo Misono, and Susumu Nagasaki 221-225
Breeding of Bialaphos Producing Strains from a Biochemical Engineering Viewpoint. Hidehi Takebe, Satoshi Imai, Hiroshi Ogawa, Atsuyuki Satoh, and Hideo Tanaka 226-232

Industrial Production of D-Aspartic Acid and L-Alanine from DL-Aspartic Acid Using a Pressurized Column Reactor Containing Immobilized *Pseudomonas dacunhae* Cells. Masaru Senuma, Osamu Otsuki, Nobuyuki Sakata, Masakatsu Furui, and Tetsuya Tosa 233-237

Microbial Production of Two New Dihydroxylated Androstenedione Derivatives by *Acremonium strictum*. Makoto Yoshihama, Masamichi Nakakoshi, Kohji Tamura, Nobuo Miyata, Gosei Kawanishi, and Mitsugi Iida 238-243

Purification and Some Properties of Endoinulinase from *Chrysosporium pannorum*. Rong Xiao, Masatoshi Tanida, and Shoichi Takao 244-248

Liquefaction of Glutinous Rice and Aroma Formation in *Tapé* Preparation by *Ragi*. Suprianto, Riichiro Ohba, Tomohide Koga, and Seinosuke Ueda 249-252

Enzyme Preparation from Extract of Wheat Bran *Koji* by Alcohol Precipitation. Tadanobu Nakadai and Seiichi Nasuno 253-257

Batch and Continuous Solid-Phase Fermentation of Jerusalem Artichoke Tubers. William R. Gibbons 258-265

Resistance Acquisition of *Thiobacillus thiooxidans* upon Cadmium and Zinc Ion Addition and Formation of Cadmium Ion-Binding and Zinc Ion-Binding Proteins Exhibiting Metallothionein-Like Properties. Kazuyuki Sakamoto, Makoto Yagasaki, Kohtaro Kirimura, and Shoji Usami 266-273

Influence of External Orthophosphate Concentrations on Some Kinetic Properties of Activated Sludge in an Anaerobic-Aerobic System. Akira Hiraishi, Kiyoshi Masamune, and Hiroshi Kitamura 274-279

Removal of Dimethyl Sulfide, Methyl Mercaptan, and Hydrogen Sulfide by Immobilized *Thiobacillus thioparus* TK-m. Yasunori Tanji, Takahiro Kanagawa, and Eiichi Mikami 280-285

Plasmid-Coded Degradation of Salicylate Using the Catechol Cleavage Pathway of the Host. Masanori Fujita, Susumu Hashimoto, Masahiro Takeo, and Kiyoko Hagino 286-290

A Simple Method for Detection of Enzyme Activities Involved in the Initial Step of Phthalate Degradation in Microorganisms. Yasutoshi Nomura, Satoshi Harashima, and Yasuji Oshima 291-296

Protein Engineering of Penicillinase as Affinity Ligands for Bioprocessing. Tadayuki Imanaka, Akio Kuroda, and Henry Y. Wang 315-320

Ethanol Fermentation of Beet Molasses by a Yeast Resistant to Distillery Waste Water and 2-Deoxyglucose. Kazuhito Moriya, Hitoshi Shimoi, Shun-ichi Sato, Kazuo Saito, and Makoto Tadenuma 321-323

Purification and Characterization of Constitutive Polyethylene Glycol (PEG) Dehydrogenase of a PEG 4000-Utilizing *Flavobacterium* sp. No. 203. Hiroshi Yamanaka and Fusako Kawai 324-330

Purification and Characteristics of Two Exoinulinases from *Chrysosporium pannorum*. Rong Xiao, Masatoshi Tanida, and Shoichi Takao 331-334

Metabolism of *n*-Alkylcyclohexanes with an Even Number of Carbon Atoms in the Side Chain by *Micrococcus* sp. RCO-4M. Fumiki Yoshizako, Mitsuo Chubachi, Atsuo Nishimura, and Teruo Ueno 335-338

Degradability of Polychlorinated Phenols by Bacterial Populations in Soil. Hohzoh Kiyohara, Noboru Takizawa, Takashi Uchiyama, Hideo Ikarugi, and Kazutaka Nagao 339-344

Effect of Mineral Salts on Apparent Viscosity and a Ratio of Product Components in Josamycin Fermentation. Hideo Eiki, Hiroshi Gushima, Hitoshi Ishida, Takeshi Saito, Yoshihiko Oka, and Takashi Osono 345-349

Utilization of Powdered Pig Bone as a Support for Immobilization of Lipase. Satoshi Negishi, Seigo Sato, Sukekuni Mukataka, and Joji Takahashi 350-355

Conversion of D-Xylose into Xylitol by Immobilized Cells of *Candida pelliculosa* and *Methanobacterium* sp. HU. Naomichi Nishio, Kyoichi Sugawa, Nobuki Hayase, and Shiro Nagai 356–360
Respiratory Inhibition of *Sphaerotilus* by Potassium Ferrate. Futaba Kazama 369–373
Purification and Characterization of a New Glucose Dehydrogenase from Vegetative Cells of *Bacillus megaterium*. Yasutaka Makino, Jiu-Yuan Ding, Seiji Negoro, Itaru Urabe, and Hirosuke Okada 374–379
Purification and Properties of β-Glucosidase from a Thermophilic Fungus *Humicola lanuginosa* (Griffon and Maublanc) Bunce. Lalitha Anand and Paul Joseph Vithayathil 380–386
Production of L-Serine from Glycine by *Corynebacterium glycinophilum* and Properties of Serine Hydroxymethyltransferase, a Key Enzyme in L-Serine Production. Koji Kubota and Kenzo Yokozeki 387–390
Effects of L-Serine Dehydratase Activity on L-Serine Production by *Corynebacterium glycinophilum* and an Examination of the Properties of the Enzyme. Koji Kubota, Kenzo Yokozeki, and Hachiro Ozaki 391–394
Glutamate Formation by a New *In Vitro* Enzyme System Consisting of Purified Glutamine Synthetase and Glutamate Synthase. Shinji Wakisaka, Ha-Chin Sung, Tetsu Aikawa, Takashi Tachiki, and Tatsurokuro Tochikura 395–398
***N*-(Benzyloxycarbonyl)-L-Aspartyl-L-Phenylalanine Methyl Ester Production by Immobilized *Nocardia opaca*: Thermolysin under Hydrogen High Pressure in a Water-Organic Solvent System.** Noriyuki Nakamura, Anny Sulaswatty, Shigeo Nishimura, Takanori Kitamura, Masao Tsuji, Toshio Kawaguchi, and Tadashi Matsunaga 399–403
Gluconic Acid Production at High Concentrations by *Aspergillus niger* Immobilized on a Nonwoven Fabric. Hiroshi Sakurai, Hang Woo Lee, Seigo Sato, Sukekuni Mukataka, and Joji Takahashi 404–408
Production of Cephalosporin C in a Fluidized-Bed Bioreactor. Young Hoon Park, Eui Yong Kim, Weon Taek Seo, Kyung Hee Jung, and Young Je Yoo 409–414
Effects of Aeration on 2,3-Butanediol Production from Glucose by *Klebsiella oxytoca*. Nasib Qureshi and Munir Cheryan 415–418

NOTES

A Modified Assessment of Growth Inhibition from Growth-Delay Time in a Cell Population Exposed to an Environmental Stress. Tetsuaki Tsuchido, Toshihiko Koike, and Mitsuo Takano 132–134
Effects of Light Intensity on the Growth Rate of the Red Alga *Porphyridium cruentum*. Eizo Sada, Shigeo Katoh, Azadeh Kheirolomoon, and Hiroshi Yokoi 135–137
Fluorometric Estimation of Viable Animal Cells Immobilized in Alginate Gel. Masahito Taya, Munetaka Yoshikawa, and Takeshi Kobayashi 138–140
Intraspecific Hybridization of *Trichoderma reesei* by Protoplast Fusion. Kihachiro Ogawa, Hitoshi Ohara, Takao Koide, and Nobuo Toyama 207–209
Purification and Properties of 5′-Nucleotidase from Alkalophilic *Bacillus* No. C-3. Yoko Ikura and Koki Horikoshi 210–211
Purification and Properties of 5-Keto-D-Fructose Reductase from a Mutant Strain Derived from *Corynebacterium* sp. Shigeo Yagi, Kobei Kobayashi, and Takayasu Sonoyama 212–214
Application of Powdered Ceramics Support to the Production of L-Tryptophan by Resting *Escherichia coli* K-12 Cells. Keiko Shimada and Kenzo Shimahara 215–218
Partially Deacetylated Chitin as an Acid-Stable Support for Enzyme Immobilization. Makoto Hisamatsu and Tetsuya Yamada 219–220

Isolation and Identification of Phthalate-Utilizing Bacteria. Yasutoshi Nomura, Nobuo Takada, and Yasuji Oshima 297–299
Inducible or Constitutive Polyethylene Glycol Dehydrogenase Involved in the Aerobic Metabolism of Polyethylene Glycol. Fusako Kawai and Hiroshi Yamanaka 300–302
Conversion of Cobalt-Free Corrinoid to Vitamin B_{12} with the Resting Cells of *Rhodobacter sphaeroides*. Ken Sasaki, Mitsunori Hayashi, and Shiro Nagai 303–305
Enhancement of Pigment Productivity of Immobilized Cultured *Lavandula vera* Cells by Limitation of Nitrogen Sources. Hiroki Nakajima, Kenji Sonomoto, Fumihiko Sato, Kunihiro Ichimura, Yasuyuki Yamada, and Atsuo Tanaka 306–308
Production of Monoclonal Antibody against Protopectinase from *Kluyveromyces wickerhamii*. Takuo Sakai, Takehiko Yagyu, Tohoru Katsuragi, and Kenzo Tonomura 309–311
Novel Photocatalytic NAD^+ Recycling System with a Semiconductor in Organic Solvent. Takuo Kawamoto, Akihisa Aoki, Kenji Sonomoto, and Atsuo Tanaka 361–362
Bioconversion of Fruit and Sugar Beet Extracts by *Zymomonas mobilis* to Ethanol and Other Fine Chemicals. Georgios Kolios, Marilena Lekka, Milton A. Typas, and Constantin Drainas 363–365
Effect of Fluoride on the Settleability of Biomass from an Activated Sludge Plant Treating Petrochemical Effluent. Manjeet Singh and Debojyoti Kar 366–368
Methane Production from Hydrogen and Carbon Dioxide and Monoxide in a Column Bioreactor of Thermophilic Methanogens by Gas Recirculation. Elizabeth C. Bugante, Yuichi Shimomura, Toshio Tanaka, Makoto Taniguchi, and Susumu Oi... 419–421
Production of α-Amylase in a Low Cost Medium by *Bacillus licheniformis* TCRDC-B13. Pratima Bajpai and Umender Sharma 422–423
Solid State Fermentation for Cellulases and β-Glucosidase Production by *Aspergillus niger*. Datta Madamwar, Sangita Patel, and Hiren Parikh 424–426
Bioconversion to Single Cell Protein: A Potential Resource Recovery from Paper Mill Solid Waste. Sandhya Swaminathan, Sharad R. Joshi, and Narsing M. Parhad ... 427–429
Biotreatment of Acrylonitrile Plant Effluent by Powdered Activated Carbon-Activated Sludge Process. Cherla Ramakrishna, Debojyoti Kar, and Jitendra D. Desai 430–432
